Professional Summary

Result-driven Python Backend Developer with 1.10 years of experience specializing in scalable microservices architecture and Rest Api development using FastAPI. Proven expertise in building production-grade backend systems with PostgreSQL, MongoDB and Redis for optimal data performance. Skilled in implementing asynchronous task processing with celery to enhance system responsiveness and throughput. Proficient in integrating third-party APIs, optimizing backend operations, and delivering high availability solutions in agile environments.

Technical Skills

- Python
- Redis
- Github
- Celery
- Code optimization
- MongoDB
- PostgreSQL
- Microservices architecture
- Fastapi
- Git
- API Integration

Experience

Python Developer — July 2025 - Jan 2026

Markets Mojo, Mumbai, India

- Implemented secure backend integration with Razorpay payment gateway, enabling steamless transaction processing and payment reconcillation.
- Design and developed custom MongoDB _id auto-increment logic to replace default ObjectId, improving data query efficiency and maintaining sequential identifier consistency.
- Develop backend feature and enhancements based on involving client requirements for existing financial technology products.
- Debugging and resolving critical backend issues affecting system stability, reducing production error by implementing robust error handling and logging mechanism.

Junior Software Developer

Shipdelight Logistics Technologies, Mumbai, India — Jan 2024 - May 2025

- Developed and maintained scalable backend services using FastAPI and Python, improving API performance and system stability.
- Developed and integrated third-party courier APIs for shipment booking and logistics automation, reducing manual effort and delivery delays.
- Designed and implemented a secure user authentication module, including signup, login and role-based access control for admin and customer users.

- Built backend APIs using FastAPI and Python, applying JWT-based authentication for secure session management.
- Applied password hashing, token expiry, and access role validation to enhance security best practices.
- Integrated Celery with Redis to manage asynchronous tasks, improving responsiveness and system throughput.

Education

Bachelor of Science (IT):
Ghanshyamdas Saraf College

Soft Skills

- Problem-solving mindset with ability to debug complex backend systems.
- Fast learner and adaptive to new technologies and frameworks.
- Strong communication skills for cross-functional team collaboration.
